- Custom Field 1
- Custom Field 2

ALL CONTENTS ARE CONFIDENTIAL

- Custom Field 3
- Description
- Insurances
- Keywords
- Location Types
- SEO Page Description
- SEO Page Title
- Services

## Fixed

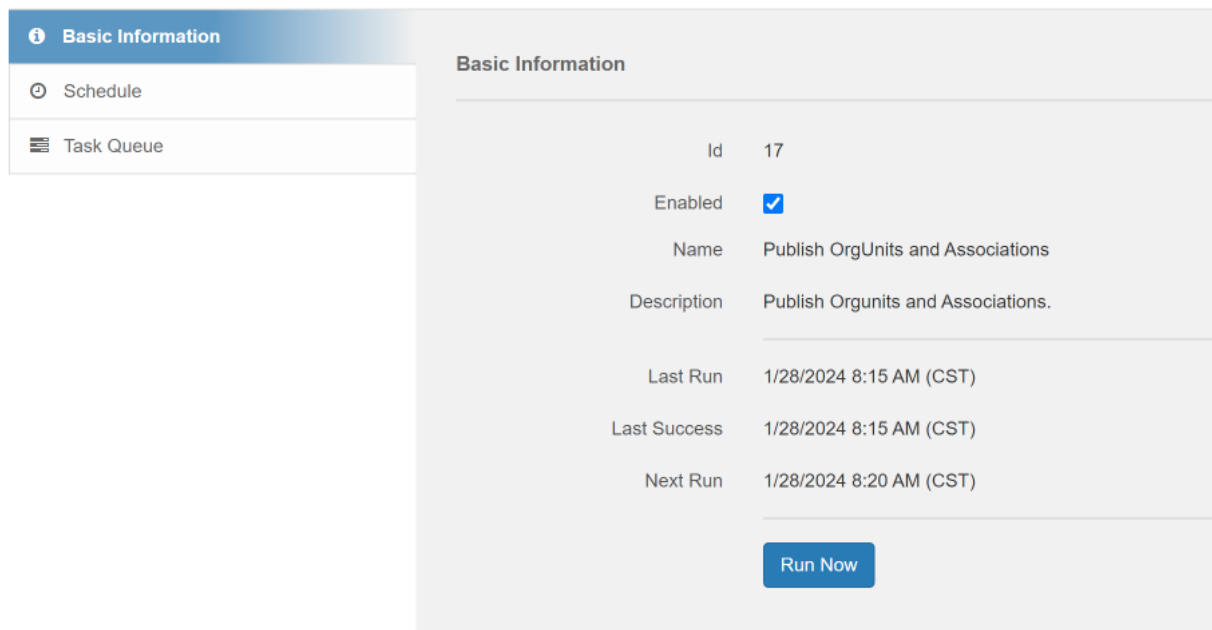

### Content Apps – Duplicate Locations in Content Apps. (COD10-4550)

When there is a large dataset for Locations and an update is made to one of the locations or location is moved in the tree-view, duplicate locations are being duplicated.

A new timer job '**Publish OrgUnits and Associations**' is created that runs every 5 minutes. Whenever a location is updated or moved in the tree-view, the location is saved and a request is sent to the new timer job to complete the backend process of updating the location associations.

### Scheduled Task - Publish OrgUnits and Associations

Edit Scheduled Task information

The screenshot shows a web interface for managing a scheduled task. On the left, there is a sidebar with a 'Basic Information' tab selected, and two sub-items: 'Schedule' and 'Task Queue'. The main content area displays the 'Basic Information' for the task. The task is identified by ID 17, is enabled (checked), and has the name 'Publish OrgUnits and Associations'. Its description is 'Publish Orgunits and Associations.'. The task was last run on 1/28/2024 at 8:15 AM (CST), with the last success occurring at the same time. The next run is scheduled for 1/28/2024 at 8:20 AM (CST). A 'Run Now' button is visible at the bottom of the task details.

Basic Information	
Id	17
Enabled	<input checked="" type="checkbox"/>
Name	Publish OrgUnits and Associations
Description	Publish Orgunits and Associations.
Last Run	1/28/2024 8:15 AM (CST)
Last Success	1/28/2024 8:15 AM (CST)
Next Run	1/28/2024 8:20 AM (CST)

[Run Now](#)

## Event Occurrence – Set Recurring Occurrence Registration Open Date Interval to 365 (COD10–4551)

When creating recurring occurrences, changed the default value of Registration Open Date Interval from 0 to 365.
