Enhanced

Event Series Registration – Allow extended dates for series of occurrences on an Event. (CMS-4288)

The events application now allows for extended registration dates on a series. If you host a class over the course of several weeks that doesn't require attendees to be present for the first session, you can extend the registration end date beyond the first meeting of the serie's occurrence. This will allow users to sign up for a class that has already started without having to use workarounds. If a registration end date is not set, the occurrence will close for registration as it does currently: at the start date and time of the first meeting in the series.

Event Roster Primary Registrants – Identify the primary registrants in Event Roster Reports and View Roster Registrants. (CMS-4330)

A column for "Primary Registrant" now appears in emailed and ad hoc roster requests for events. If a user registers himself or herself as well as a guest, the primary registrant will be denoted as "True" in the column, identifying that person as the one who filled out the registration form.

Roster Report - Heartsaver CPR for Teens

Fixed

Crownpeak Static Page – Static Page save results in error. (CMS-4294)

The save error that appears on the first save while creating custom content has been fixed.

Provider Reports – Provider reports not showing primary phone, fax and email (CMS-4284)

Primary phone, fax numbers and emails now appear in custom provider reports.
