Enhanced

Providers – Add Distance + Provider Group sort to provider search results. (CMS-4405)

Added the ability for users to cluster provider results by distance and then sort within that cluster by provider group sort. (The reverse of the current setting of clustering providers by groups and then sorting by distance)

Standard Search Sort: Alphabetical

Proximity Search Sort: Distance + Provider Group

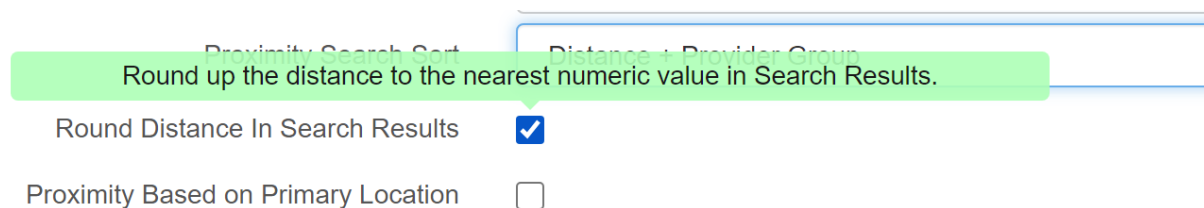

Distance In Search Results: Distance + Provider Group

Proximity Based on Primary Location:

Note: A green callout box points to the 'Distance + Provider Group' option in the Proximity Search Sort dropdown, stating 'Search results sort order when performing a proximity search'.

Provider Results Widget – Improve ‘round distance’ functionality in Search Results. (CMS-4410)

Updated the “Round Distance” functionality to round the distance server side so that the “Distance + Provider Group” sort can function as intended. The “Round Distance” checkbox will be removed from the provider search results widget and added into the content apps settings for providers. **Note:** The same setting added to Location Results Widget is not removed.

Proximity Search Sort: Distance + Provider Group

Round Distance In Search Results:

Proximity Based on Primary Location:

Note: A green callout box points to the 'Round Distance In Search Results' checkbox, stating 'Round up the distance to the nearest numeric value in Search Results.'.

Example: Distance 1.47 is rounded to 1 mile and distance 3.78 is rounded to 4 miles when the ‘Round Distance’ is checked.

Distance Configuration

CSS Class	<input type="text"/>
Show Label	<input checked="" type="checkbox"/>
Label Text	<input type="text" value="Distance"/>
Text Size	<input type="text" value="Normal"/>
Round Distance	<input checked="" type="checkbox"/>

Fixed

Event Confirmation Emails– Registrants and guests not receiving registration confirmation emails. (CMS-4386)

When the 'Require Guest Demographics' checkbox is checked, the primary and guest registrants are not receiving registration confirmation emails. The issue is fixed where the emails are received.

Location Search Results – Case insensitive exact match doesn't bubble to the top of the search results (CMS-4402)

When doing advanced search in Location Search Widget, the exact match search string bubbles to the top of the results (included in previous release). Changes are made to make the case insensitive search also bubble to the top of the results.

Event Registration – Users able to register even after the registration close date for free events (CMS-4343)

When a user keeps the event cart browser tab open until after the event has expired, the user is able to complete the registration. Additional check has been made to validate the close date before registration is completed.

Provider Search Filters – Selected filter values are duplicated and unable to clear when using asynchronous search. (CMS-4403)

When Advanced Search and specific search filters like speciality are used together with asynchronous search, the selected filters are duplicated in the Applied Filters Panel and cannot be cleared. The issue is resolved.

Release Schedule

(All dates are tentative and subject to change.)

- Tuesday January 31, 2023
- Tuesday February 28, 2023
- Tuesday March 28, 2023
- Tuesday April 25, 2023
- Tuesday May 30, 2023
- Tuesday June 27, 2023
- **Tuesday July 25, 2023**
- Tuesday August 22, 2023
- Tuesday September 19, 2023
- Tuesday October 17, 2023
- Tuesday November 14, 2023
- Tuesday December 12, 2023
- Tuesday January 30, 2024
