## Enhanced

### Events – Add basic logging to Event and Occurrence updates (CMS-4342)

Whenever an event or event occurrence is updated, basic logging information is captured and the latest 15 entries are shown under the ‘Update History’ tab in the reverse chronological order.

#### Event - ACLS Preparatory Course 1 Day Session

### Provider/Location Results Widget – Add configuration to round distance (CMS-4346)

The distance field in the Provider/Location Results Widget gives an option to round the distance. When selected, the distance is rounded up to the nearest whole number. By default, it is set to false.

Example: Distance 1.47 is rounded to 1 mile and distance 3.78 is rounded to 4 miles when the ‘Round Distance’ is checked.

## Crownpeak – Allow jQuery Version 3.7.0 (CMS-4353)

Currently we only allow the use of JQuery 1.12 and 3.0 from Site configuration. Added an option to allow Version. 3.7.0

## Fixed

### Event Details – {dateandtime} token not outputting details. (CMS-4354)

The {dateandtime} raw text token as well as the standard token are not outputting on the event details page when the occurrence (both single and series) has a registration close date.

### Provider Details – Provider Urls not displaying https (CMS-4274)

The canonical urls for providers are displaying http, not https. Google is refusing to index all provider pages because of this. The issue is fixed to show the canonical urls as https.

**Note:** This bug was isolated to a small number of sites.
