

Code	Message	Attributes Available	Severity
ERR_0000	Internal Error		Varies
ERR_0001	CSV formatting error: '<delimiter>' expected after ''''	FileName	File rejected. Batch may fail as a consequence
ERR_0002	CSV formatting error: field larger than field limit (131072)	FileName	File rejected. Batch may fail as a consequence
ERR_0003	No NUL (ASCII 0) characters are permitted.	FileName	
ERR_0006	Detected invalid UTF-8	FileName, Key, Row, Column, Value	Value-level warning
ERR_0015	Row column count does not match header column count.	FileName, Row	Record rejected
ERR_0026	Zip file is corrupt or not a zip file		Batch Failure
ERR_0027	Zip contains files that do not match naming conventions.	FileName	Warning. These files will be ignored. Batch may fail as a consequence.
ERR_0028	Zip contains more than 1 file of this type	FileName	Batch Failure
ERR_0030	Zip file name does not match specified naming conventions	FileName	Batch Failure
ERR_0033	Multiple rows with non-unique key value present in file	Key, FileName, Row	Subsequent records rejected
ERR_0033	Multiple rows with non-unique key value present in file	Key, FileName, Row	Subsequent records rejected
ERR_0034	Scoring cannot run; one or more required files are missing or empty.	FileName	Batch failure
ERR_0035	CSV formatting error: unexpected end of data	FileName	File rejected. Batch may fail as a consequence
ERR_0036	Header required but missing	FileName, Column	File rejected. Batch will probably fail as a consequence.
ERR_0037	Header unexpected	FileName, Column	File rejected. Batch will probably fail as a consequence.
ERR_0038	Header duplicated	FileName, Column	File rejected. Batch will probably fail as a consequence.
ERR_0039	Exceeded limit of <#> records	FileName	Batch failure
ERR_0040	This value is outside of the acceptable range and has been converted to <min max> for scoring	Column, Value, FileName, Key, Row	Warning
ERR_0041	This value is invalid or missing. Record excluded from scoring.	Row, FileName, Key, Column, Value	Record excluded from scoring
ERR_0042	A value for this field is recommended but invalid or missing. The quality of returned scores may be impacted.	Column, FileName, Key, Row, Value	Warning

Code	Message	Attributes Available	Severity
ERR_1001	Demographic record has no joining Visit records.	Key, Row, FileName	Orphan records rejected when referential integrity is required. If valuable but not required, we can check and add warnings.
ERR_1002	Visit record has no joining Clinical Code records.	Key, Row, FileName	Orphan records rejected when referential integrity is required. If valuable but not required, we can check and add warnings.
ERR_1003	Visit record has no joining Financial records.	Key, Row, FileName	Orphan records rejected when referential integrity is required. If valuable but not required, we can check and add warnings.
ERR_1004	Visit Record does not join to a Demographic record.	Key, FileName	
ERR_1005	Clinical Code record does not join to a Visit record.	Key, FileName	
ERR_1006	Financial record does not join to a visit record.	Key, FileName	
ERR_1009	Multiple primary diagnosis codes found for this visit. This one will be treated as secondary.	Key, FileName, Row	Subsequent records demoted to is_primary=N with warning attached.
ERR_1010	Multiple primary procedure codes found for this visit. This one will be treated as secondary.	Key, FileName, Row	Subsequent records demoted to is_primary=N with warning attached.
ERR_1102	Demographic record is disqualified from CHUI due to age less than 18 years at score date "<score_date>".	Key, FileName	Record rejected
ERR_1202	Demographic record is disqualified from PDI due to age less than 0 years at score date "<score_date>".	Key, FileName	Record rejected
ERR_1203	Demographic record is disqualified from PDI due to no joined visit record with an admit date more recent than 3 years prior to score date "<score_date>".	Key, FileName	Record rejected
