

Library: Gastroenterology

Relevant Standard: PC.02.03.01

The hospital provides patient education and training based on each patient's needs and abilities.

Element of Performance: 10

Based on the patient's condition and assessed needs, the education and training provided to the patient by the hospital include any of the following:

- An explanation of the plan for care, treatment, and services
- Basic health practices and safety
- Information on the safe and effective use of medications (See also MM.06.01.01, EP 9; MM.06.01.03, EPs 3–6)
- Nutrition interventions (for example, supplements) and modified diets
- Discussion of pain, the risk for pain, the importance of effective pain management, the pain assessment process, and methods for pain management
- Information on oral health
- Information on the safe and effective use of medical equipment or supplies provided by the hospital
- Habilitation or rehabilitation techniques to help the patient reach maximum independence
- Fall reduction strategies
